

# Case Study Proofing

## GMG ColorProof – Proofing, Poster Printing

KK-Druck

Rapid production of high-quality proofs and posters with GMG ColorProof and Canon imagePROGRAF iPF6300\*

Company	KK-Druck, Martinsried (near Munich, Germany), 15 employees. A media service provider for clients from a wide variety of sectors.
Application	Media design, prepress, digital printing, offset printing, and finishing.
Job definition	Proofing of print products designed in-house, and of external data supplied without a proof. Layout and forme proofing, poster printing.
Previous method	Proof production using a printer from a different manufacturer.
GMG products in use	GMG ColorProof 5, GMG ProofControl, GMG ProofPaper semimatte 250.
Printer	Canon imagePROGRAF iPF6300.
Advantages	<ul style="list-style-type: none"><li>▶ Proof production within very close color tolerances.</li><li>▶ Exact color reproduction, good repeatability, and rapid recalibration of the Canon printer.</li><li>▶ Significant time savings, since the proofs can be produced faster than on printers from other manufacturers.</li><li>▶ GMG ColorProof makes very good use of the large gamut of the Canon imagePROGRAF iPF6300.</li><li>▶ The new, clearly structured user interface of ColorProof 5 makes proofing easier than ever before.</li><li>▶ Great flexibility because, in addition to proofs, posters can also be quickly printed between-times.</li><li>▶ Reliable, highly stable solution.</li><li>▶ Good price/performance ratio.</li></ul>
Customer statement: Michael Buchwieser, Manager Prepress/Digital Printing, KK-Druck	„GMG has always been at the heart of our proofing solution, and we have continuously improved our proofing system via the printers, starting with an IRIS and progressing all the way to the Canon imagePROGRAF iPF6300. The GMG/Canon system is a successful solution in every respect.“
